

Ashworth Laboratory Accessibility Works

Lee Boyd led the team responsible for the design of the new accessibility improvements to the Ashworth Building at Kings Buildings, for the University of Edinburgh. Works included the design of a new wheelchair accessible approach and access to the main entrance of this grade B listed building, as well as the integration of new lighting to illuminate the facade and strengthen the visibility of this gateway to the Kings' Buildings Campus.

The design and setting out of the original stairs was taken as reference, updated to meet current standards for accessibility and integrated with two new curved ramps leading to a level threshold at the original entrance. Internally the original doors and entrance lobby were refurbished with new entrance matting, lighting, decoration and the automation of both sets of doors.

Client: University of Edinburgh
Value: undisclosed
Completion: October 2018
